PROFESSIONAL SUMMARY

Python Backend & Full Stack Developer with nearly 4 years of professional experience building and deploying REST APIs and web applications with Django/DRF and FastAPI, using PostgreSQL/PostGIS, MySQL, Redis, Celery, AWS, and Docker. Since Aug 2025, built and deployed three live projects end to end, including a real-time delivery platform and a RAG-based document Q&A system, with React frontends. Seeking Python / Django Backend Engineer roles in India.

TECHNICAL SKILLS

Languages: Python, JavaScript
Backend: Django, Django REST Framework, FastAPI, Flask, REST APIs, WebSockets, Django Channels, JWT authentication
Databases & Async: PostgreSQL, MySQL, MongoDB, Redis, Celery
Cloud & DevOps: AWS (EC2, S3), Docker, Docker Compose, Linux, Nginx, GitHub Actions CI/CD, Git
Frontend: React, Vite, Tailwind CSS
GenAI & Tools: RAG, LangChain, OpenAI API, FAISS, Groq API, Razorpay and Stripe APIs, Jira

PROFESSIONAL EXPERIENCE

Independent Software Developer | Self-directed projects, Remote **Aug 2025 - Present**

- Designed, built, and deployed three applications (FastMart, SmartDoc, FreeTalk) with live demos and public GitHub repositories, covering API design, database modelling, real-time features, and deployment.
- Built backend services with Django/DRF and FastAPI on PostgreSQL/PostGIS and Redis; added WebSockets, Celery background jobs, Razorpay payments, and OpenAI/Groq LLM integrations.
- Containerised services with Docker Compose, served them behind Nginx, and set up GitHub Actions CI/CD for automated deployment.

Friends Corp | Software Engineer | Tokyo, Japan (Remote) **Feb 2025 - Aug 2025**

- Developed and tested software features; analysed application behaviour and refactored code to improve reliability and maintainability.
- Maintained technical documentation, including design notes, user guides, and API references.

Relu Consultancy | Django Developer | Bhopal, India (Remote) **Oct 2021 - Jan 2025**

- Developed and maintained Django REST Framework applications and REST APIs.
- Designed MySQL/PostgreSQL schemas and optimised queries for application performance.
- Deployed and supported applications on AWS, Linux, and Windows Server; diagnosed and resolved application and server-side issues.

KEY PROJECTS

FastMart - Same-Day Delivery Platform | *Django, DRF, PostGIS, Channels, Celery, Redis, React, Razorpay*
Code: github.com/imran6932/FastMart Demo: fastmart.imranansari.in/

- Built customer, rider, and admin apps on a single Django/DRF backend with JWT auth, catalogue and order management, and Razorpay checkout; Celery Beat releases abandoned 10-minute stock holds.
- Implemented live rider GPS tracking over WebSockets (10-second updates), PostGIS nearest-warehouse and rider-assignment queries, delivery batching (up to 4 orders), and OSRM routing on Leaflet maps.

SmartDoc - RAG Document Q&A | *FastAPI, LangChain, OpenAI, FAISS, Redis, React, Docker*
Code: github.com/imran6932/SmartDoc Demo: smartdoc.imranansari.in/

- Built question answering over PDF/DOCX/TXT files using chunking, embeddings, and FAISS retrieval; routes specific questions to top-4 chunk RAG and broad ones to full-document context, with multi-turn sessions.
- Added Redis-backed per-IP rate limiting, Docker Compose deployment, and GitHub Actions CI/CD.

FreeTalk - Conversational AI with Admin Dashboard | *FastAPI, Groq API, Redis, React, Docker*
Code: github.com/imran6932/FreeTalk Demo: freetalk.imranansari.in/

- Built a Hindi/English/Hinglish AI chat service with Redis-backed conversation history and a secured admin dashboard for reviewing conversations, user metadata and search.

Additional: iFleet (fleet, driver, and vehicle tracking with reports; MongoDB, Celery) and Push-app (proximity-based PWA notifications; PostGIS, pywebpush).

EDUCATION

B.Tech, Electronics & Communication | Gandhi Engineering College, Bhubaneswar | CGPA: 6.45/10 **2018**
